**Wednesday 9/6/2006
4:30pm
Willet Science Center 101**

Tools for Managing the Information Explosion

With the growth in the number of journals and the advent of online publishing, the number of sources and amount of information scholars are required to keep track of has exploded. In this talk, I will demonstrate several technologies that can aid in keeping track of important scholarship information. The talk will begin by illustrating the use of RSS feeds to keep track of current work in a given field. I will then briefly touch on the use of the ISI Web of Science online database. The talk will conclude by exploring the use of BibTex to manage bibliographic databases for publications.

Please join us for light refreshments at 4:15pm outside WSC 109.
